The purpose of lean systems is to make problems glaringly obvious. It begins with
Thanks for telling us about the problem. It examines the
principles, systems, and tools of continuous improvement and
demonstrates how to deploy these proven methods in plants and
distribution centers. I think it covered the main topics but I
found it tedious in most chapters due to having to translate
all the manufacturing examples to health care.

Making Innovation Work presents a formal innovation process to prevent workarounds.
Rapid Response System. Two guidelines for the charts are: Use
binary color-coding: green means all is good, red means we
have a problem To be able to react to the possible deviation
of the standard, the interval in which the KPI is measured
should be as short as possible, preferably every couple of
hours.
