One fifth of the column height produces an entablature height of 2. All the principal mouldings are enriched with ornament - the extent to which this is applied depends on the scale and purpose of the particular design - except for the large crowning cyma and its terminal fillet, which are plain, certainly where an external order is proposed. A single example will serve to illustrate .

Each column should have twenty-four flutes This idea was taken up strongly in the training of Beaux-Arts architecture - The Doric order later spread across Greece and into Sicily where it was the chief order for monumental architecture for years. If this expanding programme of rehabilitation were to be carried on with sense using ThoughtCo, you accept. For the Doric order the Ionic order and the Corinthian order originally developed by the Greeks, the Roman writer Vitruvius attempted to formulate the proportionings of their parts.
