This study was criticized by pre-ecological and even some environmental ecologists.

This text is essential reading for students researching business and management and who are interested in the Fractal Sustainability concept. Transparency in the regulation of water utilities is essential in order to ensure quality and fairness.

Through a comparison of these the authors explore the contested and difficult root idea of ecological aesthetics originated from Aldo Leopold [9121314]. Environmental changes and urban sprawl have caused landscape resources to be under attack; therefore, it has been advised that people appreciate and protect landscape resources whether for environmental aesthetics or ethics.
