And when you make small talk at your office holiday party, can Listening Eyes keep your eyes focused on the person in front of you instead of scoping out the room, looking for the next conversation? Cognitive scientists have long been interested in the role that eye gaze plays in social interactions. In a speech time series, moments of speech and silence can be represented by 1s and 0s. They have no agenda. At this point the participants played their next game. The present study offers insight into the temporal dynamics of live dyadic interactions and also provides a new method of analysis for eye Listening Eyes data when temporal relationships are of .
