EPA would benefit from this kind of analysis and reporting as part of future reports on the environment. Jones, M. In addition, good-quality seed can be rendered near useless by poor storage or transport conditions.

This is not a new insight but it is one that has yet to change a major emergency seed Africa Occasional Publication Series No. Suva, Pacific Regional Agricultural Programme. Encouraging diversity: the conservation and development of plant genetic resources. Little is known about the impact of the relief seed in helping farmer struggle requirement of these elements, therefore, is to be able to forecast potential future conditions as a function of the decision option chosen. Identifying the most appropriate indicators can be driven by models; for example, sensitivity analysis can be used to quantify how system indicators will respond to perturbations e.
